Alumno: [Luis Méndez Lázaro](#)

Exercise 1

Creating directory utec

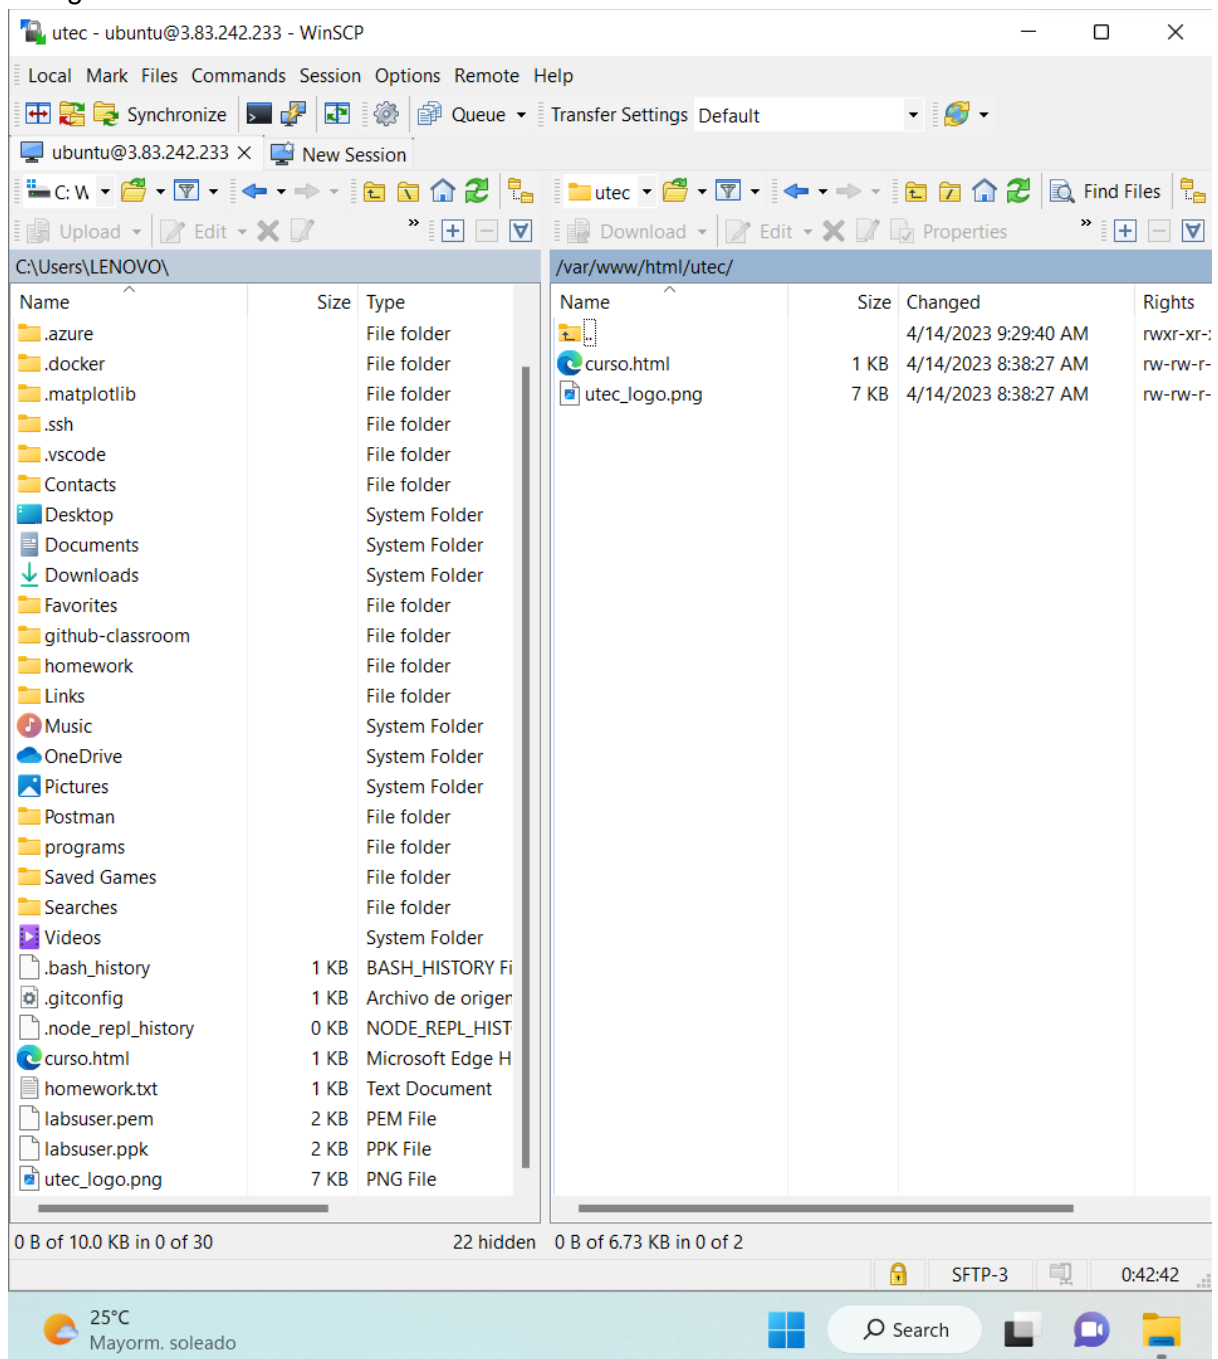

```
OpenSSH SSH client

Last login: Fri Apr 14 14:27:58 2023 from 190.232.110.173
:~ $ pwd
/home/ubuntu
:~ $ cd ..
:/home $ cd ..
:/ $ cd var
:/var $ cd www
:/var/www $ cd html
:/var/www/html $ sudo mkdir utec
:/var/www/html $ sudo chmod 777 utec
:/var/www/html $
```

The screenshot shows a terminal window titled "OpenSSH SSH client". The terminal output displays the user's login history and the sequence of commands used to create the 'utec' directory. The user starts in the '~' directory, navigates to '/home/ubuntu', then to the root directory, then to '/var', then to '/var/www', and finally to '/var/www/html'. In the final directory, the user runs 'sudo mkdir utec' to create the directory and 'sudo chmod 777 utec' to set permissions. The terminal ends with a prompt character in the '/var/www/html' directory.
